

## “Special K Products”

**Low CEC Special 0-0-28**  
**Soluble K with 5% Mg,**  
**3% Mn, 3% Fe, 0.1% Zn & Cu**

**“Coated K Special” 0-0-37**  
**Polymer coated slow release K**  
**with 3% Mg, 5%Mn, & 2% Fe**

### “Special K Products” are :

High quality, SGN 100 fertilizers for use on bermudagrass or bentgrass, greens, tees and athletic fields.

These products are specially designed for use on low CEC soils to provide higher amounts of the nutrients most commonly leached from high sand content growing mediums due to rainfall, irrigation or high sodium situations. Both products contain high percentages of K, Mg, Mn, Fe, and 0-0-28 also contains trace amounts of Cu and Zn. 0-0-28 “Low CEC Special” is a soluble K formulation. 0-0-37 “Coated K” provides a slow release K feeding from 100% polymer coated K.

### “Special K” Features and Benefits:

*Routine use of K, Mg & Mn provide the following research proven benefits:*

- Improved heat and drought tolerance
- Lowered disease incidence
- Increased root density
- Improved color without an increase in shoot growth

### Application frequency and rates:

- Can be used in conjunction with foliar applied “spoon feeding” programs to replenish leached nutrients
- Apply 0-0-28 “Soluble K” every 2-4 weeks @ 0.5-1.0 lbs. K/M
- Apply 0-0-37 “Coated K” every 4-8 weeks @ 1.0-2.0 lbs. K/M
- 100 SGN, small particle formulation disperses with minimal watering
- Very economical application of key nutrients when compared to similar spray applied products.

### Nutrient Information:

100% of K Readily available potassium sulfate / 0-0-28 (soluble) & 0-0-38 (coated slow release)  
 100% of Mn Manganese sucate is chemically treated to enhance solubility and plant availability  
 100% of Fe Iron sucate is chemically treated to enhance solubility and plant availability  
 100% of Mg Magnesium sucate is chemically treated to enhance solubility and plant availability

**Composition:** Fine Particle physical blend    **SGN:** 100    **Uniformity Index:** 45+

**Labeled Rates:** Rates vary by product (see below)    **Packaging:** 50 lb bag

Product	Typical Rate		Maximum Rate	
	Coverage	Rate	Coverage	Rate
0-0-28 “Soluble K”	4,000 sq ft	1.0 lb K/M	9,333 sq ft	1.5 lbs K/M
0-0-37 “Coated K”	9,500 sq ft	2.0 lbs K/M	6,333 sq ft	3.0 lbs K/M

Irrigate 5-10 minutes after application especially if temperatures are expected to exceed 80 degrees, or if foliage is moist with dew, to reduce micronutrients staining.
